Trucks Silver \$33.98 pair, Colored \$37.98 pair (unless otherwise noted)

Trucks come in various heights and widths. Truck axle width should be closely matched to your deck width—or at least within 1/4 inch. Truck heights only differ by about 1/4 inch. If you use bigger wheels then you should either use higher trucks, risers, or both to avoid wheelbite (contact of wheel with deck).

Snowboards Slide - Snowboards slide and that's a fact. Every snowboarder, freestyle to slalom, uses sliding as part of his or her technique. Sliding allows integrated speed control, rapid changes in direction and the widest range of maneuvering possibilities. Freeboard's patented truck design allows controlled sliding on pavement just like a snowboard slides on snow.

Sliding and Carving - Snowboarding seamlessly blends carving and sliding and Freeboard works exactly the same way. A rider can touch the ground in a deep carve, effortlessly drift over the pavement or ride anywhere in between.

Snowboards Have Edges - The edge and base design of a snowboard requires you to keep pressure on your uphill edge at all times. Freeboard duplicates this interface so every minute spent riding Freeboard reinforces the edging skills needed on the snow. Tricks learned on the pavement apply directly to the slopes. This is true cross-training.

Real Speed Control - Snowboarders control speed by carving back and forth across the fall line, skidding turns to dump speed, or setting a firm edge. Freeboard allows all these maneuvers at any speed with no speed wobbles. Ride the streets confidently knowing that you can cut speed or stop at any time.

Pure Carve Training - Every rider enjoys pure carves and it takes skill to hold tight turns without drifting. Freeboard allows realistic carve training because it drifts just like a snowboard. Learn to pure carve your Freeboard and you'll have the skill to pure carve on the snow.

Hide Folds - Freeboard is uniquely suited for practicing switch. Ride switch on a Freeboard and you'll learn all the edge control skills needed on the snow. And Freeboard slides in and out of take just as smoothly as a snowboard.

Nowices: The True Test - Novices trained on Freeboards outperform novices trained on any other product. Freeboard's edging interface instructs how not to drop a downhill edge and Freeboard's sliding and carving capabilities teach how to roll weight on and off the board's edges. These skills are essential for any rider and only Freeboard teaches them off the snow.

Freeboard. The most advanced snowboard cross-trainer in the world.
